Education

Jabalpur Engineering College

Sept 2023 – Present

B-Tech in Computer Science

- **Coursework:** Computer Architecture, Artificial Intelligence and Machine Learning, Object Oriented programming, Design and Analysis of Algorithm, Data Structure

Technical Skills

Languages & Libraries: HTML5, CSS3, SCSS, JavaScript (ES6+), React.js

Frontend Skills: DOM Manipulation, Responsive Web Design, UI Design, LocalStorage

API & Data: Fetch API, JSON

Version Control: Git, GitHub

Tools & Platforms: VS Code, Chrome DevTools, Figma

Projects

E-commerce Web App

Developed a responsive shopping interface with product listings and filters.

using HTML, CSS, and JavaScript with dynamic DOM rendering

- Implemented cart functionality with add/remove and total calculation
- Used localStorage to preserve cart state across sessions

Weather Forecast App

Responsive weather app that fetches real-time data using the OpenWeatherMap API.

- Fetches and displays real-time weather data using OpenWeatherMap API
- Displays weather info with validation and error handling
- Leveraged modern JavaScript methods for API interaction and JSON data handling.

Campus Connect

A platform to connect students with events and shared notes

- React.js, HTML, CSS, JavaScript, Firebase, GitHub
- Responsive web portal with admin/student views, event registration, note uploads, and login
- Includes calendar sync and gamification with badges and point-based rewards

Leadership & Involvement

JLUG (Technical Club, JEC) – Graphic & Technical Team Member

Sept 2024 – Present

- Contributed to both the **graphics** and **technical** teams during **Inertia 2025**, the annual tech fest of JEC
- Collaborated on organizing and managing **CodeKumbh**, a college-level hackathon during Inertia 2025.
- Contributed to both technical execution and design strategy as part of the Inertia 2025 organizing team
- Created branding assets and digital content for events, enhancing JLUG's online presence
